

# What are the outdoor recreation needs in your region?

## Transportation

Access points to trails. Need to disperse as much as possible and provide adequate parking.

Public Transit to sites like the foothills, Petroglyphs and Valle del Oro is almost non-existent especially from low income communities like the International District and Westgate.

buses to Valle de Oro and petroglyph NM

Extending public transportation services to Jemez on the weekends to alleviate traffic

amenities in the vicinity of outdoor recreation resources

## Education

All recreation opportunities are also educational opportunities.

Need for bike shops. Bike mechanic certification programs through CCs in NM

Access is a big issue. 90% of young people in ABQ don't go outdoors. Transportation is a big barrier.

need for proper equipment and gear for low-income people. Programs to increase access to equipment.

low-income neighborhoods have the fewest resources and the poorest quality resources. Work with government to improve and increase resources. International district in particular need bike infrastructure

promote lesser used facilities to potential users

Need for coordination in wayfinding for trails. Centralized resource for maps and wayfinding. Difficult for visitors who don't know where they are

## Resources in low-communities

ADA accessibility is important. Not a lot of resources. Tingly beach is a good example.

## resource management

Connecting recreation development to community economic development. Cuba example

Focus on educating to prevent trash and littering

Outdoor education is one of the first things that gets cut in school

Places become very popular. Parking becomes an issue. Disperse resources. think about parking when developing resources

Plans for dealing with trash and littering

build new resources to pull users and provide time for improvement

Need for better wayfinding geared to first-time users

Better access to Rio Grande for boating/kayaking

HIGH

LOW

# What are the opportunities or barriers to meeting your region's outdoor recreation needs?

grant match requirement

hurdles when resources cross multiple jurisdictions and ownership

NIMBYs

transportation

Use/parking fees

Designations for trail dimensions and definitions prioritizes certain communities over others. Opportunity to change this to increase resources

Barriers to indigenous communities receiving funding. support for indigenous communities

Need to directly ask the people most impacted. Talk to young people and people of color

make sure governments work together and are moving toward to same goal

opportunity to break down procedural barriers

Partnerships with schools

I-40 and -25 bring in economic development

resources for New Mexicans to ride the wave of outdoor economic development

(RE: Use/ parking fees) Tiered fee structure. Incentives for local, young, older populations

OEF

Barriers

Opportunities
